

WEDNESDAY, 19 AUGUST 2009, MACAULAY B

The Leverhulme Trust is supporting the development of an International Network to support the sustainable management of water in the Pantanal, South America. The Pantanal is the largest freshwater wetland in the world, and is subject to increasing urban, industrial, agricultural, navigational and recreational development pressures.

11:00-11:45

“Experience of integrated catchment management in Taquari River, Pantanal”, Rob Jongman, Alterra

11:45-12:30

“Strategy for diffuse pollution mitigation in Scotland”, Jannette MacDonald, Scottish Environmental Protection Agency (SEPA)

From 18-20 August, The Macaulay Land Use Research Institute will be hosting a workshop of Brazilian, Scottish and Dutch water scientists and stakeholders. Two of the keynote talks (one on Brazilian catchment management, one on Scottish catchment management) are being opened to a wider audience, and you are warmly invited to attend. For more information contact Andy Vinten (a.vinten@macaulay.ac.uk).
